

Business model

Seminar Ministry EZK The Hague

8 December 2017

SCOBDO Project

- Co-financed with public money
- Participants invested themselves as well
- Two types of deliverables:
 - Public documents
 - Proprietary documents and software

Public deliverables

- Access to the repository (SVN level) is public
- Specifications are public
 - Reference data model
 - Specification of (XML-)language in which mappings are expressed
 - Specification of XSLT conventions

Non-public products

- Mapping software
- Portal functions
- Invoice converting services

Participants are free to develop their own business model
